VAN HYBRID DOCK SHELTER

THE PARCEL DISTRIBUTION SOLUTION

WSTP SERIES VAN SHELTERS

SUPERIOR SOLUTIONS FOR LOADING AND UNLOADING

International Specialist in Safe, Superior Quality Loading & Unloading Solutions

Stertil Dock Products provides quality, customised and technically advanced loading bay dock equipment solutions throughout the world. These superior solutions are designed, developed and manufactured in-house by a team of specialists with expertise in the loading bay equipment industry.

Stertil Dock Products is represented internationally by local Stertil sales organisations, exclusive distributors and a network of qualified Stertil Dock Products Service partners. Stertil Dock Products is the No. 1 safety and quality specialist in loading bay dock equipment. A whole array of patented products is a result of more than 45 years of experience and a continued commitment to ensuring safety in and around the loading bay.

Fast, Safe and Durable

In the rapidly growing market of online services, parcel service organisations are distributing a vast amount of goods 24/7/365 from dedicated and specialised logistics hubs. Often a beehive of activity where speed is of the essence and a specific dock solution for vans and small commercial vehicles is required that aids in the loading and unloading process allowing for a continuous unbroken expedition of goods.

Van HYBRID - Perfect Combination

This parcel distribution solution is designed from combining different shelter solutions for the perfect van and small truck solution. A panel roof for protection against the weather; soft and protective cushions and an optional inflatable durable top cushion.

Designed for Transit Parcel Vans & Small Trucks

The WSTP Van Hybrid Dock Shelter enables the doors of transit vans and other small commercial vehicles to be opened to 180 degrees for maximum access during loading and unloading. This shelter minimalises space and gaps between the docked vehicle and the shelter. The soft and durable padding prevents either damage to the vehicle or the building and prevents excessive temperature fluctuations due to the fact that the vehicle can be docked against the building.

Features & benefits

- Effective, safe and easy docking due to specific design of the shelter
- Designed for transit parcel vans and small commercial vehicles that have rear doors open 180 degrees
- Trapezium open-aspect of shelter allows full visibility for driver
- Special recess in the shelter top cushion for rear-view cameras
- Strong soft foam cushions have 98% compression recovery
- Manufactured using high performance PVC and cushions resistant to mold and damp
- Corrosion-resistant galvanised mounting plates

Safety

Parcel Industry Solution

FAST, EFFICIENT AND SAFE IN USE

Open-aspect design

The trapezium open-aspect design and the built-in recess in the top cushion for vans that have a rear-view camera, are two safety features that assist the driver for the safe and correct positioning of the vehicle onto the loading bay.

Inflatable Top Cushion

Inflatable top cushion suitable for smaller-sized vans, optimal sealing and less temperature fluctuations or draft during loading and unloading.

Leveller seen from inside warehouse

Van Bridge Plate Dock Leveller

Van Bridge Plate Dock Leveller

This convenient safe and ergonomic bridging solution provides a simple and effective way of dealing with a height difference between the building floor and the vehicle. It can also help prevent accidents by reducing the risk of industrial injury caused by falling or tripping. The Van Bridge Plate Dock Leveller is a manually operated telescopic mini dock leveller with a standard dynamic capacity of 750 kg and available in a light version with a capacity of 200 kg. This leveller can easily be installed without additional construction work.

The Van Bridge Plate Dock Leveller and the WSTP Van Hybrid Dock Shelter are available as a complete set or can be installed individually.

Cleverly designed folding door

Specially designed roof to prevent against wind and rain

Folding Cube Door

The WSTP Van Hybrid Shelter is more than just a shelter, it can be a complete system with the cube folding door. The cleverly designed cube folding door provides a simple and compact installation without ceiling rails. It offers space-saving functionality by conveniently folding-up above the shelter, allowing for an optimal use of the available warehouse space.

Options

- Extra reinforced wear plates on the shelter side cushions
- Additional inflatable top cushion for smaller sized vans
- Bottom cushion for additional dock-van sealing
- Adaptable frame designed for distribution centres or warehouses with an incline or decline; an approach with a ramp
